Timor-Leste : The History and Development of Asia's Newest Nation

Joseph, Abraham; Hamaguchi, Takako; 以及更多 Lexington Books 2014

ISBN: 9780739191200, 9780739111217

After enduring years of conflict and destruction, Timor-Leste has risen from the ashes and, within a short span of time, made remarkable strides toward recovery and reconstruction. It is today a nation well on its way to peace and prosperity, creating an example to be followed by other fragile and u...

描述
In this sweeping, unabashed history of oil, Matthieu Auzanneau takes a fresh, thought-provoking look at the way oil interests have commandeered politics and economies, changed cultures, disrupted power balances across the globe, and spawned wars. He upends commonly held assumptions about key political and financial aspects of the most 150 years, and he sheds light on what you all concerned and eventually most oil-fueled might

Foreword

had sought to harness the power of oil, a tremendous, unstoppable power. Washington were fearful of China to purchase ballistic missiles. The course of the investigations financed the laboratories of nuclear bomb—and the Republic of Aramco eliminated the last Saudi company changed its name to become the Saudi Arabian Oil Company, in other words Saudi Aramco. Dr. Ali Al-Naimi, educated at Stanford University, assumed full direction of the richest company in the world. The “greatest single prize in all history” no longer belonged to Americans.

The BCCI and George Bush's Good Fortunes

The links between Washington and the metamorphose. In November 1971, George H. W. Bush...

Get up to 86 pages, use any PDF software, does not expire.

Description

This volume includes eight chapters describing recent advancements in chemistry research. Chapter One compares commercially available equipment with a novel aerosol detection and measurement method. Chapter Two is a review of preparation methods and biological activity of amino acid Schiff base compounds and their metal complexes. Chapter Three provides an insight into the antitumor activity of osmium(IV) complexes. [Show more](#)
